

# ECONOMIC IMPACT OF ARKANSAS' INLAND WATERWAYS

IN 2021, ARKANSAS' PORTS, INLAND WATERWAYS,  
AND INLAND WATERWAYS-DEPENDENT INDUSTRIES SUPPORTED

Nearly **71,000 jobs**

**\$3.7 billion** in personal income

**\$7.0 billion** in Gross State Product

**\$15.2 billion** in total output

...Giving rise to  
**\$452 million**  
in state & local  
tax revenue

Arkansas has nearly

**1,860 MILES**

of navigable inland  
waterways, ranking it

**3<sup>rd</sup>** in the  
nation

## INLAND WATERWAYS SUPPORT ARKANSAS' KEY INDUSTRIES

Industry Sub-Category	Percent of Goods Shipped by Water (Tons)	Direct Arkansas Jobs
Crop Production	➡ <b>16.4%</b> of outbound	4,300*
Waste Mgmt & Remediation Ser	➡ <b>27.5%</b> of inbound	3,840
Primary Metal Manufacturing	➡ <b>27.7%</b> of inbound	7,370
Fabricated Metal Product Mfg	➡ <b>9.0%</b> of inbound	14,560

\*Total for Agriculture, Forestry, Fishing, and Hunting sector (NAICS 11)

## TOP INLAND WATERWAYS COMMODITIES BY WEIGHT (comprising 61% of total tonnage)

Food & Food  
Products,  
such as  
oils & seeds

**4.8 million tons**

Sand, Gravel,  
Shells, Clay,  
Salt, & Slag

**3.4 million tons**

Iron Ore,  
Iron, & Steel  
Waste and  
Scrap

**3.4 million tons**

## TOP INLAND WATERWAYS COMMODITIES BY VALUE (comprising 52% of total value)

Waste/Scrap

**\$683 million**

Agricultural  
Products, such  
as oils & seeds

**\$294 million**

Cereal Grains,  
including  
wheat, corn,  
barley, & oats

**\$274 million**

## ARKANSAS' INLAND WATERWAY ASSETS AT A GLANCE

Mississippi, Arkansas,  
Ouachita, Red, and  
White Rivers

**10** public  
ports

In 2021,  
**18.9M** tons of  
freight  
valued at  
**\$2.4 BILLION**  
moved on Arkansas'  
inland waterways, which  
is equivalent to  
**473,000 TRUCKS**

Avoided trucks translates into  
**reduced congestion, emissions,  
and crashes**, and contributes to  
the state of good repair of  
highway infrastructure

## BENEFITS OF INLAND WATERWAYS TRANSPORTATION

America's inland waterways system is vital to our nation's competitiveness and economic growth. The inland waterways efficiently, sustainably, cost-effectively and safely transport critical commodities like agricultural goods, energy products, building materials and industrial chemicals to destinations within the U.S. and to deep water ports for export. In 2021, nearly 500 million tons of goods valued at more than \$158 billion moved on the U.S. inland waterways system. The U.S. Department of Transportation Freight Analysis Framework freight forecasts suggest total water tonnage will increase at an annual growth of 0.7% per year through 2040. Barge transportation is the safest, most environmentally friendly, economical, and fuel-efficient way to move our nation's goods for use domestically and for export. On a single gallon of fuel, one barge can move freight more than four times farther than trucks, releasing 10 times fewer emissions.

Called "the backbone of the transportation logistics system," the inland waterways are a key part of the United States' transportation supply chain. The system includes a vast network of 12,000 miles of connecting waterways and 219 locks. However, the majority of locks and dams on the Mississippi River system were constructed during the 1930s and are operating well beyond their 50-year design life. Modernizing the nation's inland waterways system will support and create American jobs, increase U.S. exports, and inject billions of dollars into the U.S. economy to power our growth for the next 50 years.

Our nation's ports and waterways remain the crucial **backbone of our economy**. Approximately **2.3B tons of cargo** are shipped to, from or through **41 states each year**. The U.S. marine transportation industry supports **trillions of dollars in commerce and millions of jobs**.

Source: U.S. Army Corps of Engineers Value to the Nation Civil Works, 2021.

The annual net economic benefit generated by the Corps' Civil Works mission is estimated to be **\$89B** – a return of about **\$12 for every dollar expended** – with the total amount provided to improve the nation's water infrastructure at **\$10.24B**.

Marine transportation is critical to **agricultural exports**, forecast at **\$175.5B**.

Agriculture will provide a **\$10.5B trade surplus** to the American economy, with **imports forecast at \$165 billion**. Forestry and fishery products, and critical farm inputs such as fertilizer, feed, and fuel move on the waterway system as well.

Agricultural exports are responsible for **25.5%** of **U.S. farm income**, also driving rural economic activity and supporting more than **1M American jobs** on and off the farm.
