

# ECONOMIC IMPACT OF TEXAS' INLAND WATERWAYS

IN 2021, TEXAS' INLAND PORTS, INLAND WATERWAYS, AND INLAND WATERWAYS-DEPENDENT INDUSTRIES SUPPORTED

Nearly **305,000 jobs**

**\$27.9 billion** in personal income

**\$54.6 billion** in Gross State Product

**\$111.0 billion** in total output

...Giving rise to **\$7.7 billion** in state & local tax revenue

Texas has nearly

**830 MILES**

of navigable inland waterways, ranking it

**13<sup>th</sup>** in the nation

## INLAND WATERWAYS SUPPORT TEXAS' KEY INDUSTRIES

Industry Sub-Category	Percent of Goods Shipped by Water (Tons)	Direct Texas Jobs
Oil & Gas Extraction	↻ 6.3% of outbound	39,162
Primary Metal Manufacturing	↻ 8.6% of inbound	14,110
Chemical Manufacturing	↻ 21.1% of inbound / ↻ 23.1% of outbound	41,433
Petroleum & Coal Products Mfg	↻ 6.3% of inbound / ↻ 6.3% of outbound	14,547

## TOP INLAND WATERWAYS COMMODITIES BY WEIGHT (comprising 92% of total tonnage)

**Petroleum Products** **46.8 million tons**

**Chemicals, excluding fertilizers** **18.6 million tons**

**Crude Petroleum** **7.8 million tons**

## TOP INLAND WATERWAYS COMMODITIES BY VALUE (comprising 62% of total value)

**Basic Chemicals Used in Consumer Products, including appliances, toys, & cosmetics** **\$12.5 billion**

**Fuel Oils** **\$12.2 billion**

**Gasoline** **\$9.6 billion**

## TEXAS' INLAND WATERWAY ASSETS AT A GLANCE

**Sabine, Neches, Trinity, Brazos, Colorado, Guadalupe, and San Antonio Rivers and the Gulf Intracoastal Waterway**

**23 public ports**

In 2021, **79.7M tons of freight** valued at **\$54.9 BILLION** moved on Texas' inland waterways, which is equivalent to over **2.0 MILLION TRUCKS**

Avoided trucks translates into **reduced congestion, emissions, and crashes**, and contributes to the state of good repair of highway infrastructure

**13%** of Texas' **MARINE FREIGHT TONNAGE** moves on inland waterways

## BENEFITS OF INLAND WATERWAYS TRANSPORTATION

America's inland waterways system is vital to our nation's competitiveness and economic growth. The inland waterways efficiently, sustainably, cost-effectively and safely transport critical commodities like agricultural goods, energy products, building materials and industrial chemicals to destinations within the U.S. and to deep water ports for export. In 2021, nearly 500 million tons of goods valued at more than \$158 billion moved on the U.S. inland waterways system. The U.S. Department of Transportation Freight Analysis Framework freight forecasts suggest total water tonnage will increase at an annual growth of 0.7% per year through 2040. Barge transportation is the safest, most environmentally friendly, economical, and fuel-efficient way to move our nation's goods for use domestically and for export. On a single gallon of fuel, one barge can move freight more than four times farther than trucks, releasing 10 times fewer emissions.

Called "the backbone of the transportation logistics system," the inland waterways are a key part of the United States' transportation supply chain. The system includes a vast network of 12,000 miles of connecting waterways and 219 locks. However, the majority of locks and dams on the Mississippi River system were constructed during the 1930s and are operating well beyond their 50-year design life. Modernizing the nation's inland waterways system will support and create American jobs, increase U.S. exports, and inject billions of dollars into the U.S. economy to power our growth for the next 50 years.

Our nation's ports and waterways remain the crucial **backbone of our economy**. Approximately **2.3B tons of cargo** are shipped to, from or through **41 states each year**. The U.S. marine transportation industry supports **trillions of dollars in commerce and millions of jobs**.

Source: U.S. Army Corps of Engineers Value to the Nation Civil Works, 2021.

The annual net economic benefit generated by the Corps' Civil Works mission is estimated to be **\$89B** – a return of about **\$12 for every dollar expended** – with the total amount provided to improve the nation's water infrastructure at **\$10.24B**.

Marine transportation is critical to **agricultural exports**, forecast at **\$175.5B**.

Agriculture will provide a **\$10.5B trade surplus** to the American economy, with **imports forecast at \$165 billion**. Forestry and fishery products, and critical farm inputs such as fertilizer, feed, and fuel move on the waterway system as well.

Agricultural exports are responsible for **25.5%** of **U.S. farm income**, also driving rural economic activity and supporting more than **1M American jobs** on and off the farm.
